

## C Programming Language Day-wise Break UP

Day No.	Contents
1	Tokens, DataType, Function, recursion, enum, preprocessor directives
2	Array( Concept, Types, Passing array to the function ), pointer( Concept, dereferencing, Scale factor, const and pointer combination)
3	Dynamic memory allocation and string( concept, built-in functions and their simulation)
4	Command line argument, Function pointer, structure( pass by value & address, array of structure, nested structure)
5	File Handling
